

Medical Tourism

INDIA ranks amongst the top 10 best countries for affordable medical treatment for almost all possible ailments. **India's medical tourism** sector was estimated to be worth US\$3 billion. It is projected to grow at a CAGR of 200% by 2020, hitting \$9 billion by 2020. In 2017, 495,056 patients visited **India** to seek **medical** care.

We, at Effects Multimedia, take a step ahead & invite patients from across the globe to get treated in Tier-2 cities of INDIA instead of expensive Metros & Tier-1. This proves into getting much better treatment & medical care at much lower expense.

What we do –

1. Once in touch, we register the patient in our database & call for scanned copies & images of all the medical reports available with the patient. A processing fee of **Rs. 6500.00/- (INR)** for patients in India and **\$90.00 (USD)** for international patients applies. We subsidize this fee for low income and BPL patients. Expert doctors concerned from our panel reviews a summary of patient's reports and provide their opinion of which treatment option will work best.
2. We then take consent from the patient for his/her willingness to come down to the Indian city we suggest. We chalk-out the best suitable itinerary considering the appointment with the doctor, availability of hospital, arrangement of conveyance, food, etc. and tentative cost of full treatment & facilities. For this itinerary, a processing fee of **Rs. 2500.00/- (INR)** for patients in India and **\$35.00 (USD)** for international patients is charged.
3. All these communications are done genuinely through Emails to maintain authenticity.
